Regenerating cities with nature

Hamburg, London and Milan are making nature-based interventions in key districts of their cities for urban regeneration. Through exchange between cities, inclusive collaboration and multi-disciplinary learning, the CLEVER Cities project aims to drive a new kind of nature-based urban transformation for sustainable and socially inclusive cities across Europe, South America and China.

CLEVER cities are green

Urban nature improves the environment, creates economic opportunities and makes cities healthier places to live. Green spaces also bring people together, which makes our communities more resilient, as well as boosting urban resilience to climate change.

Hamburg

Citizens will help introduce new green roofs and facades as well as green links to **NEUGRABEN-FISCHBEK**. Pupils will be engaged in nature projects including, among others, the co-creative and eco-friendly redesign of a school playground.

CLEVER cities are community-driven

Local teams including citizens, businesses, knowledge partners and local authorities have been formed in Hamburg, London and Milan. This collaborative structure will ensure that the urban transformation process is open, inclusive and tailored to local needs.

Milan

Bottom-up projects will promote green roofs and walls, green infrastructures and noise barriers, and locals will decide how to make space for urban gardening in **LORENTEGGIO-GAMBELLINO DISTRICT** and around the **TIBALDI** train stop.

CLEVER cities are innovative

We build on local capacities, expertise and potential to generate innovation and to develop new future-proof governance, financing and business models for sustainable prosperity.

Image: Nicola Murphy-Evans

London

New planting will green walking routes to improve connections and encourage people in **SOUTH THAMESMEAD** to be more active. There will be a focus on Maran Way and bordering courtyards, Abbey Way 'Green Chain Walk' leading to Southmere Lake, and some smaller spaces.

CLEVER cities are global

Sfântu Gheorghe, Quito, Madrid, Belgrade, Larissa and Malmö share and learn with London, Hamburg and Milan on how to adapt nature-based interventions for the needs of towns and cities around the world.
